

## Daniel Boone Conservation League Wood Duck Nest Box Yearly Results

<b>Year</b>	<b>Number of Houses</b>	<b>Houses occupied</b>	<b>% Occupied</b>	<b>Hatched eggs*</b>
<b>2007</b>	<b>18</b>	<b>8</b>	<b>45%</b>	<b>85</b>
<b>2008</b>	<b>18</b>	<b>14</b>	<b>77%</b>	<b>138</b>
<b>2009</b>	<b>23</b>	<b>17</b>	<b>74%</b>	<b>179</b>
<b>2010</b>	<b>25</b>	<b>15</b>	<b>60%</b>	<b>164</b>
<b>Total Eggs Hatched:</b>				<b>566</b>

\* Total eggs hatched, is an estimate from data taken when the nest boxes are cleaned out. Wood ducks generally lay 12 to 15 eggs in a sitting. The average nest has 12 eggs. The un-hatched eggs found at cleanout are subtracted from this to get the estimated hatch.
